

Kodak

Intelligent Prepress Manager 2.0

Enhance your line of sight

What if your equipment produced top-quality plates—hour after hour—with no monitoring by operators, who can now spend their time smart multi-tasking? What if your equipment could alert you when it needed attention, regardless of your location?

The **Kodak Intelligent Prepress Manager 2.0 (iPM 2.0)** makes this scenario a reality. This innovative service provides fully automated monitoring of up to five plate lines. Its powerful features give you the flexibility and control to manage prepress operations from anywhere—at any time—and drive improved profitability through:

- Higher productivity
- Improved process stability
- Reduced costs and waste

Make faster, data-driven decisions

Understanding how your operation is performing is essential to cutting costs. With intelligent monitoring and reporting, iPM 2.0 provides a continuous stream of real-time data you can use to harness more productivity from your prepress systems.

With an intuitive user interface, you'll find it easy to:

- Generate reports that track plate usage and equipment utilization, enabling you to optimize operational efficiency and control costs
- Identify and correct potential problems, reducing process inefficiencies
- Measure performance against production and efficiency goals

Even when you're off site, you can keep a digital eye on your operation with webcams. Eliminating the need for constant manual checks translates to longer unattended operation and frees your operators to work on higher-value tasks, driving costs down and productivity up.

Maximize efficiency with smart alerts

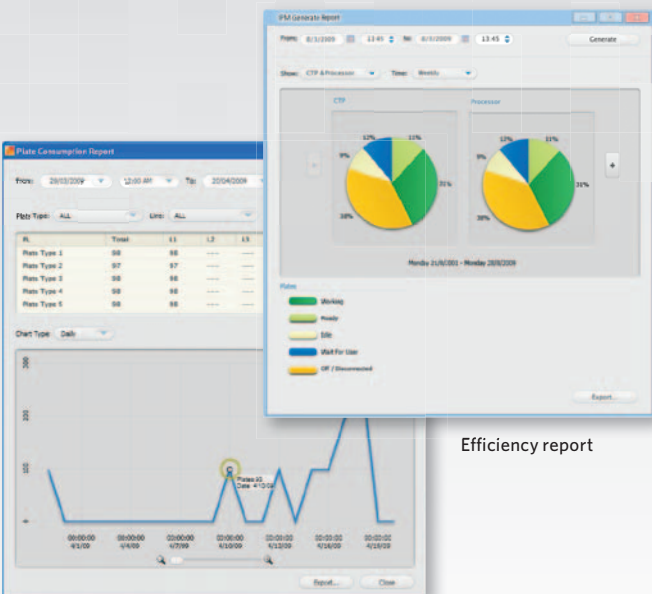

iPM 2.0's automatic status updates give you the information you need to keep the system operating at peak efficiency. Timely smart alerts notify you immediately if a line stops, plate stock needs replenishing, maintenance is required, or a job has finished, for example. You'll even be able to optimize chemistry usage and reduce waste by managing equipment status.

This screen displays online camera details.

The iPM 2.0 pop-up screen appears only when notification is needed. This screen displays details about online processors.

Efficiency report

Media consumption report

Kodak Intelligent Prepress Manager 2.0 requires connectivity to Kodak, and is designed to work with Kodak CTP Systems and Plate Line Equipment.

Manage operations anytime, anywhere

Imagine managing your prepress operations anytime, from anywhere. iPM 2.0 lets you go mobile, giving you access to real-time data from your laptop, smartphone, or mobile device. No matter where you are, you'll be able to maintain control—and optimize efficiency—of up to five plate lines. iPM 2.0 keeps you connected to your prepress operation.

Safeguard critical data and minimize downtime

Have you ever lost critical data? iPM 2.0 automatically safeguards critical files with fast and safe backup. If data is unexpectedly lost, Kodak rapidly recovers and restores that data, maintaining business continuity with minimal downtime so you can continue to meet your client commitments.

Unlock the potential of your prepress system

The Kodak Intelligent Prepress Manager 2.0 gives you the power to unlock the potential of your prepress system and drive improvement to your bottom line with:

- Increased uptime and reduced costs
- Greater productivity and mobile flexibility
- The assurance that your critical data is safely backed up
- The ability to make smarter, data-driven decisions—anytime, anywhere
