Versamark

Font Tools 6.0

Easy-to-use font conversion

Kodak Versamark Font Tools 6.0 is a font, graphic conversion and editing tool that can be used with any **Kodak Versamark** Printing System that employs a **Kodak Versamark** CS150, CS340 or CS400 System Controller. Font Tools 6.0 also creates barcode fonts for common symbologies and converts Windows TrueType fonts into **Kodak Versamark** raster fonts in all supported print resolutions.

Font Tools 6.0 is fully featured to allow maximum versatility and ease of use in font conversions. Utilities within the program allow conversion for output to **Kodak Versamark** D-Series and V-Series printers and

provide for optimum print quality through special ink-reduction algorithms. Once converted, fonts can be imported and used with all the same data preparation and job-layout software as with fonts obtained from **Kodak**.

Graphics

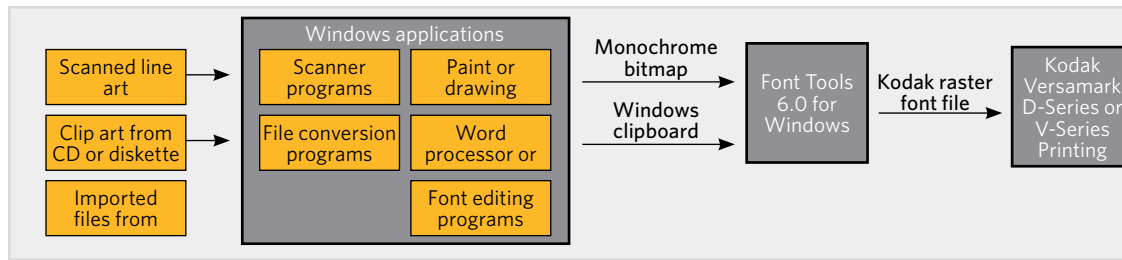

Font Tools 6.0 lets you use your favorite Windows applications to create, scan and import logos, symbols, clip art, line drawings or messages containing graphic text. You can also create graphics on a Macintosh system and port them to a Windows OS-based PC and into the Font Tools 6.0 via a compatible file format.

Font Tools 6.0 performs a dot-for-dot conversion of the input image to a font-file-format graphic font recognized by the **Kodak Versamark** Printing System.

Fonts loaded into Font Tools 6.0 can be viewed and edited with a built-in graphical user interface. Editing can be done at the dot level for precise tuning of font characters.

Double-byte character sets are supported, including the ability to add and edit font characters. The complete UNICODE range a font occupies is supported.

Kodak Versamark Font Tools 6.0

Barcodes

You can use Font Tools 6.0 to generate any of the following barcode symbologies in one of the font formats supported by the Kodak Versamark Printing System:

- Code 39
- Code 93
- Code 128
- Codabar
- Interleaved 2 of 5
- Non-interleaved 2 of 5

TrueType Fonts

Font Tools 6.0 lets you convert any TrueType font installed in a Windows environment into the raster format recognized by Kodak Versamark Printing Systems. Kodak Versamark CS150 Controller supports both linear and compact flash cards for font download, depending upon the printer used. Font Tools 6.0 can

program flash cards used in the CS150 Controller.

- Compact Flash card supports the following Kodak Versamark D-Series Printing Systems: DS5222, DS5340, DS5650 and DS5640.
- Linear Flash card supports the following Kodak Versamark D-Series Printing Systems DS4350, DS7122, DS5122, DS5120, DS5240

PostScript fonts

PostScript fonts resident in Windows can be used with Kodak Versamark Printing Systems if they are first converted to TrueType fonts using a conversion utility (not included with Font Tools 6.0).

The character set included in the font file is the Windows ANSI character set. Output encoding tables may be used to generate EBCDIC or custom character sets. After selecting the TrueType font to be converted

(including size, style and resolution), you can view the character map of the font using the built-in viewer.

Microsoft operating systems supported

- Windows 2000
- Windows XP

Input files supported

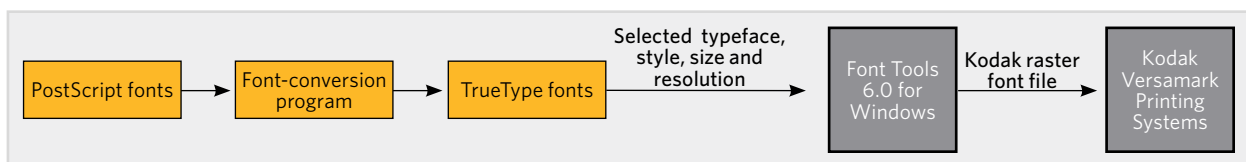

Bitmap files (such as JPG, GIF, BMP)

Printing systems supported

Any Kodak Versamark D-Series or V-Series Printing System

Resolutions supported

- 120 x 120 dpi
- 120 x 240 dpi
- 240 x 240 dpi
- 240 x 480 dpi
- 300 x 150 dpi
- 300 x 300 dpi
- 300 x 600 dpi
